NEWEDGE WORKFLOW PRODUCTS

3 Accounting Automation

NewEdge Workflow will reduce accounting 1.Purchasing workflow module: enables organizaaccounting processes in your organisation.

Our Solution will plug the gaps in your accounting process or system, improving your workflow and saving you more time and money.

Streamline your end-to-end accounting process, from ledger management to financial close and everything in between NewEdge Workflow Solution will do the heavy lifting for you while allowing your finance team to concentrate on value-added activities that drive business growth.

Advanced planning, budgeting, forecasting and integration with your accounting software

NewEdge Workflow budgeting module, can be used to manage all aspects of your organisation's planning, budgeting, and forecasting requirements. It seamlessly integrates with your accounting software and comes with a suite of customisable dashboards and reports built with advanced business intelligence features.

Our workflow features enable you to drastically improve your Planning, Budgeting and Forecasting processes. It can also upgrade or replace your Planning, **Budgeting and Forecasting Software** Our workflow features will replace your Planning, Budgeting and Forecasting Software, and also replace all other 3rd party software. Reducing your need to manage multiple disparate systems and helping reduce your costs. It's one platform to replace them all ie ION, MAXIMO, SUNFLOW, POWER B1 etc can all be replaced.

WORKFLOWS

tions to manage the entire purchasing process from supplier onboarding to requisition to payment

The module ensures that spending is controlled and aligned to organisational objectives through intelligent workflows, approvals, and authorisations.

This module will eliminate manual, cumbersome, and time-consuming processes that are both expensive and error-prone.

Our Purchasing workflow solution helps you automate and better control your purchasing processes, so you can focus on your strategic priorities and drive growth. We have built workflows for the following:

- Purchase invoice approval
- **Expense reimbursements**
- Credit card statement processing
- Sales invoicing
- Journal entry approval
- Supplier onboarding
 - Fixed asset onboarding
- Simple timesheets
- Intercompany invoicing
- Static data creation

We will Automate the onboarding process to add new suppliers quickly and easily to the system. Our Powerful workflows enable you to manage the entire process from request to approval, ensuring that only authorised suppliers are given access to your system.

2. HR and Recruitment workflow Module

From recruiting and onboarding to performance management and employee development, NewEdge Workflow Solutions will plug the gaps that exist in your HR processes. NewEdge Workflows will automate your HR processes while making your employees more engaged and productive. Create a great place to work at every stage of growth with flexible HR apps that streamlines core HR processes and allows you to manage employees' leave requests, expense claims, benefits, devices, and more—all in one place.

5. Reporting

NewEdge Workflow dynamic reporting solution gives you the ability to generate accurate, up-to-date reports, transform your data into actionable information, and easily access valuable financial and non-financial data for quicker and better decision-making.

With real-time visibility of your data, you can quickly identify and act on opportunities and threats; and ensure that everyone has access to the information they need when they need it.

6. Sales Order Management Workflow

From customer acquisition and order management to billing and collections, the NewEdge Sales solution automates your entire Order-to-Cash process.

Our Workflow Solution helps you accelerate order processing, improve customer satisfaction, and increase operational efficiency. With real-time visibility of the sales process, you can make informed decisions that drive growth

7. Newedge Travel Workflow Module has a travel requisition feature that caters for employees who need to book flights, accommodation, or a rental car. Employees will be able to request a subsistence allowance, Employess can capture additional physical expenses which they have incurred and reimbursed.

The Travel Requisition Management process caters for both local and international travel. Employees can specify the currencies the they require for their travels. The process is flexible enough to handle your company's authorisation rules, quotation gathering, and the communication between requestor and approver.

Requestors receive an itinerary which lists the flights that have been booked, including connecting flights, the car hire and accommodation details and any other relevant information. If advance payments are required, or cash payments for taxi's and visas, these expenses are included, and physical proof of these expenses can be loaded when the employee returns from their journey

CONSULTANCY SERVICES

1.Financial Software site audits, we offer a review of the current financial system, suggestions for the way forward and the business benefits which might arise as a result of acting upon those suggestions. We do business mapping workshops to establish if the current chart of accounts in an organization meets their requirements

2. Sunsystems Training, we offer Sunsystems training to organizations using Sunsystems accounting software. We have a pool of Sun certified consultants to choose from.

Our Key Training Objectives include being able to:

- Navigate around Sunsystems Software
- Creating and Maintaining customer details within Sunsystems
- Entering invoices and setting up a ledger
- Performing the accounts receivable cycle
- Allocating transactions
- Performing online inquiries
- Creating a single integrated ledger for combining analysis and functionality of nominal sales and purchase ledgers, cashbook, analysis/ project ledger
- Making flexible transactions and account analysis
- Opening periods to match posting and reporting requirements of the organization.
- Supporting multiple budgets
- Creating a flexible ledger inquiry function, automated payment terms, functionality to calculate due dates etc.

3 Wagemaster Hr And Payroll System

Wagemaster is an on-premises, networkable, integrated payroll and human resource management software that can be used by companies of all sizes. It features complete computation of payroll from basic entries of earnings with automatic tax calculation and deductions tracking. It has a range of management reports as well as employee pay slips as well as the complete set of tax returns for PAYE, NSSF and NHIF. The system produces bank transfer files for upload to bank software.

The payroll system can also import processed monthly regular, overtime and absence hours from a suitable time attendance system. Timesheets and project based earnings can also be processed. Casual employees and weekly payrolls are also supported. The system is fully customizable through user settings. Any company specific earnings and deductions can be created.

In addition to payroll computation it has a full human resource management database featuring over 100 pieces of employee data. The system handles recruitment, appraisals, and disciplinary records with linkage to scanned documents for each employee record. It also features a leave tracking module capable of automatic calculation of leave days due and deduction of leave days taken.
